

opening doors to new possibilities

say **YES** to our future
CAPITAL CAMPAIGN 2010

The beauty of Transfiguration is that our enthusiasm and growth are not confined within the boundaries of our walls. We continuously spread the Holy Spirit of God in to our neighboring community and beyond! Amazingly, as space becomes available on this campus, not only does it support the needs of our parish family, but new opportunities reveal themselves for ways we can serve those around us. Building the new multipurpose space will allow us to expand our education and information ministries by providing a flexible, general purpose space that can be used for speakers' forums, workshops, seminars and artistic performances, plus allow us to host more ecumenical events.

By working together to change hearts and minds through education, information and empowerment, people will be inspired to seek and serve Christ in ALL persons and work towards justice and peace for all humanity. Now is the time to let the world see that Transfiguration can lead with one voice and say a resounding **YES** to our future!
